

Graph prior over evidence chains
Paths make chains auditable

(1) Query-specific heterogeneous graphs

Construct question-specific text-KG subgraphs;
 expand bridge neighborhoods

Primary effect:
 Improves
 Observability (θ_{obs})
 And
 Fusion(θ_{fus})

(2) LM-GNN coupled reasoners

Couple language representations with graph
 message passing

Primary effect:
 Improves
 Fusion(θ_{fus})

(3) LLM-built and LLM-traversed graphs

Couple language representations with graph
 message passing

Primary effect:
 Improves
 Observability (θ_{obs})
 And
 Faithfulness(θ_{faith})
