answer evidence

C^*

OBSERVABLE AUDIT TRACE

L_N

chain retrieved

$\mathcal{P}$

E_K

chain retained

$S = \mathcal{P} \cap S_K$

$\pi(E_K)$

chain exposed

$\mathcal{O} = S \cap \mathcal{O}_r$

$G(q, E_K)$

valid composition

$\mathcal{V} = \mathcal{O} \cap U_G$

$\hat{a}$

causally used

$\mathcal{T} = \mathcal{V} \cap T_C$

Grounded success

$$P(Y_g) = \theta_{obs} \theta_{sel} \theta_{exp} \theta_{fus} \theta_{faith}$$

Every factor refers to a nested event in the audited chain.

Ordinary answer success

$$P(Y) = P(Y_g) + P(Y \cap \neg \mathcal{T})$$

shortcut / parametric leakage
